x264 825mb nltRo-XpoZ My question is, how can I get a
unique name for every re-upload? I've searched for an
answer but haven't found one yet. Thanks in advance! A:

```
You can use something like this: $files_array =  
array_merge($files_array, $new_files_array);  
foreach($files_array as $id => $file) { $clean_file =  
preg_replace('~\./+', ' ', $file); $num = rand(0,99999);  
$clean_file.= ".{$num}"; $destination = "path  
to your destination"; // move the file $success =  
copy($file, $destination); if (!$success) { $message =  
"The file $file did not upload!"; break; } } So here's a  
special treat for all of you who played Guitar Hero 3 (you

never know what will come up next, right? Well, I'm here  
to announce that Guitar Hero 5 is almost here!!! In fact,  
the release date is Oct. 22. What does that mean for  
you? Well, you'll be able to get your hands on the game  
on launch day! The characters will be available in the  
same configuration that they are now (easier to play)  
and you'll be able to use the "Guitar Heroes" that you've  
unlocked previously in the game. And for those of you  
that have never played GH3, we have put a lot of time  
into the difficulty settings to make this game the  
"ultimate" version. We have a ton of surprise features  
that we're not allowed to talk about yet, so make sure  
you're checking www.guitarhero.com all the time. I know  
that's not much of a tease,
